ARCHITECT'S PLANS
AT
REASONABLE RATES

WE have drawn plans and made specifications for over 2500 buildings in San Francisco and California within the last five years, and have not had any dissatisfied client, and are now prepared to furnish Plans and Specifications at a considerably lower rate than is usually charged. We will also compete with other architects on any building to be erected. The small home-builder or client, in city or country, will receive just as much attention and courtesy as the prospective building of a hotel or apartment house; nothing being too small or too large for us to handle.

We will make plans and steel drawings, if desired, without insisting upon superintending the work, but will always give expert advice, free of charge, to any builder using our Plans and Specifications.

Sketches and full information furnished by mail.

Correspondence solicited.

OUR BUSINESS

We reduce your Gas Bill 15 to 30 per cent. by attaching our

Standard Automatic Gas Regulator to the house gas pipe. This machine controls the pressure, prevents waste and blowing and lessens breakage of globes, chimneys and mantles.

On notification we stop leaks and flickering of lights, furnish new tips and burners free whenever necessary.

The monthly charge includes the above service and use of our regulator.

BANKING AND OFFICE CENTER OF OAKLAND, CALIFORNIA

Oakland Facts:

Bank assets, over $70,000,000; bank clearings gain 100 per cent in two years; annual real estate sales, $30,000,000; water front development, $25,000,000; railroad development, $25,000,000; new city hall costing $1,500,000; two new hotels, costing $3,000,000; two new department stores, costing $2,000,000; new city auditorium, costing $500,000; new school buildings to cost $3,000,000; new city parking system, costing $2,000,000; fourth largest city in gain of population, U. S. census, 1910; thirty-first city in United States as to population; Oakland ranks twentieth city in United States in value of new construction; Oakland ranks fifteenth city in United States in number of new buildings; population (1900) 66,000, (1910) 150,153, (1914) 184,158 (including Berkeley, Alameda, Richmond and suburbs, 300,000). New York Life, Equitable and other big insurance companies have loaned millions on Oakland real estate. Oakland business men have just subscribed and paid in one million cash capital for a fire insurance company. Southern Pacific terminates here; Western Pacific terminates here; Union Pacific terminates here; Santa Fe terminates here; San Francisco, Oakland and San Jose terminates here; Oakland and Antioch and Eastern terminates here. Grasp this: Thirty-two million people traveled on Oakland ferry system in 1912! Southern Pacific has just spent fourteen millions here and is spending ten millions more. What does this mean? Oakland is one of the cities of the United States that owns and controls its own water front (thirty miles) and is spending millions to make it ready for Panama Canal traffic. Oakland is opposite San Francisco and the Panama-Pacific World's Fair site. It is on the land or continental side of the great San Francisco Bay and is destined to be the New York of the Pacific Ocean. Why? If the 1913 plans of the U. S. Government is carried out as recommended on western and southern waterfront, which means a fifty million dollar harbor development by U. S. Government, City of Oakland and private and railroad interest that will rank with Hamburg, Havre, The Hague and Liverpool. **REMEMBER THIS, The United States Government** has recognized Oakland's great waterfront on the land side of the great San Francisco Bay.

Direct ferry now running from Oakland to Exposition grounds.

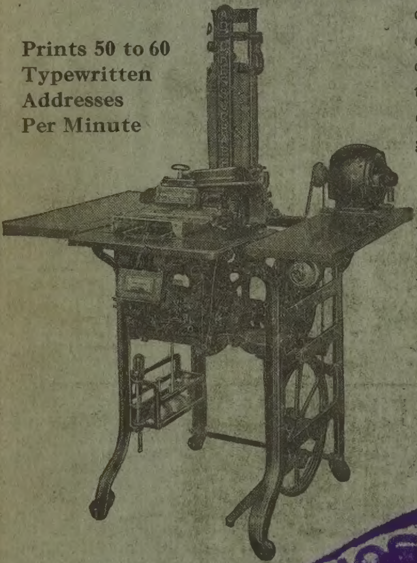
DO YOU know that your advertisement in the Crocker-Langley San Francisco Directory can be seen in the above Cities? Same is made possible by our Directories being on file in all the different Cities in the United States, Canada and Foreign Countries.

Addressograph
PRINTS FROM TYPE

IT IS easy to install the ADDRESSOGRAPH—you send your list of names to this office, where an address plate is made up for each name. Or, you can make your own address plates with the Office Graphotype, a machine which embosses an address on a plate almost as quickly as it can be written on the typewriter.

The address plates serve as card indexes and are filed in steel drawers in any desired order in the same manner as cards in an ordinary card file. By means of sub-dividing tabs of any desired style, the address plates can be arranged and classified alphabetically, numerically, geographically, or in any desired manner.



So efficient is the ADDRESSOGRAPH as a card index and constant reference file that many users have discarded card files and rely entirely on this system for maintaining their valuable lists.

More than 40,000 merchants and manufacturers in 239 distinct lines of business are saving time, labor and money, building business and increasing the efficiency of their office forces with the ADDRESSOGRAPH—you cannot afford to be without it.

The ADDRESSOGRAPH is used by manufacturers, wholesalers, department stores, retailers, [illegible] and trust companies, real estate and insurance companies, public service corporations, government departments, associations, laundries and cleaners, commission merchants, brokers, publishers, and in all lines where a regular list of names is maintained and frequently addressed.

Tell us the size and nature of your regular list of names. Send us samples of the circulars, cards, envelopes and special forms you address from these lists. And without obligation on your part we shall tell you all about the ADDRESSOGRAPH for your needs and show you in dollars and cents just what it will save you.
